Stability*	M1 Stable at RT/ 45° C/ -18° C Stable after M1 of freeze/thaw cycles -5/+40° C

Raw materials from SEPPIC

MONTANOV™ 68

Cetearyl Alcohol and Cetearyl Glucoside

Glucolipid emulsifier derived from vegetable origin. It can be used to formulate rich, smooth textures with any type of oil phase. Promoter of liquid crystals, it plays a role in maintaining skin moisturization over time. Ecocert, Cosmos and Natrue approved.

MONTANOV™ 202

Arachidyl Alcohol and Behenyl Alcohol and Arachidyl Glucoside

Glucolipid emulsifier derived from vegetable origin. Promoter of liquid crystals, it plays a role in maintaining skin moisturization over time. Thanks to liquid crystals which contain water, MONTANOV™ 202 helps to keep skin moisturized. Ecocert and Natrue approved.

LANOL™ 99

Isononyl Isononanoate

Emollient agent.

TIMECODE™

Palmitoyl Glycine

To win time against wrinkles, TIMECODE™ explores the new causes of ageing: 1. It decreases chronic inflammation which destabilizes cellular exchange. 2. The dermal extra-cellular matrix (ECM) is strengthened. 3. Micro-vascularisation is improved to obtain a younger and fresher complexion. Up to 78% of volunteers were satisfied with the results obtained from TIMECODE™, the wrinkle corrector (action on deep and medium wrinkles, as well as on the total wrinkled area)

SEPINOV™ EMT 10

Hydroxyethyl Acrylate / Sodium Acryloyldimethyl Taurate Copolymer

Powder polymer «2-in-1», thickening in a wide pH range (3-12), ready to use, with an excellent stabilizing properties at low level and in presence of a high % of oily phase.

Sensory profile: "satin" touch, fresh, glide-on

SOLAGUM™ AX

Acacia Senegal Gum and Xanthan Gum

Combination of natural thickening polymers. It allows you to formulate non-stringy translucent gels and can be used with hot or cold process. Ecocert and Natrue approved.

AQUAXYL™

Xylitylglucoside and Anhydroxylitol and Xylitol

AQUAXYL™ moisturizes and restructures the skin by harmonizing the hydric flow of the skin. Water reserves are instantly boosted, water circulation is improved in all skin layers and water loss is reduced (in vitro and in vivo tests prove this efficacy). It's mechanism of action has been validated by cosmetogenomics. Ecocert and Natrue approved.

JUVENESSENCE AD

Caprylic/capric Triglyceride- Algae extract

Reduction of the accelerated aging protein: Progerin

Metabolism reactivation of aging cells

Detoxification (stimulates proteasome activity)

Increases mitochondrial, ribosomal and immune system activities

Optimizes skin firmness and hydration, improves the skin grain

CELLULOSOMES CIC2

Crithmum Maritimum Extract

Pure Sea Fennel stem cells which acts on the prevention of skin aging & cutaneous pigmentation (in vivo study).
