EU07247-1213
Formula

A	Kaolin	27.00%
	Cyclodextrin	5.00%
	Tapioca Starch	45.70%
	SEPIMAT™ SB	10.00%
	Cellulose	10.00%
	LIPACIDE™ C8G	1.00%
B	AQUAXYL™	1.00%
	Parfum / Fragrance	0.30%

Procedure
DIOSNA – 3kg

Melt all the powders in the DIOSNA during 2 minutes. Put the Aquaxyl and a fragrance in a mortar and add the powders 25g by 25g until reach 175g. Grind it until all the liquids have been absorbed by the powder. Pour the blending in the DIOSNA with the powders blending and melt. Put the powders back in the DIOSNA for 2 minutes without the chopper, then, 2 minutes with the chopper.

Characteristics

Appearance	Soft beige powder
Stability	M1 at RT and 45° C

Raw materials from SEPPIC

AQUAXYL™
Xylitylglucoside and Anhydroxylitol and Xylitol

AQUAXYL™ moisturizes and strengthens the hair: maintains moisture deep in the hair, protects the integrity of hair fibers. Moreover, it improves the foam quality and reduces irritation induced by some surfactants (LESNa...). It's mechanism of action has been validated by cosmetogenomics. Ecocert and Natrue approved.

LIPACIDE™ C8G
Capryloyl Glycine

A glycine biovector and skin acidifying agent, it protects the skin and helps maintain its ecosystem. It also protects cosmetic products by increasing the microbiological stability of formulas with a low preservative content. Ecocert approved.

SEPIMAT™ SB
Methyl Methacrylate Crosspolymer

SEPIMAT™ SB, consisting of absorbent, soft microspheres is ideal for a soft and matte skin appearance. This versatile and easy-to-disperse powder is suitable for all types of formulations and is especially adapted for fluid or sprayable formulations due to its fine granulometry.

Other raw materials...

- Kaolin : **Kaolin Pharma (GIFRER)**
- Cyclodextrin : **Cavamax W7 Pharma (WACKER)**
- Tapioca Starch : **Naviance Tapioca PLM (AKZO)**
- Cellulose : **Vitacel CS20FC (RETTENMAIER)**
- Fragrance : **Parfum Cola Drink (TECHNICO FLOR)**
