## Procedure

### Trimix 5 kg

Add the water of the phase A into the tank, heat at 80°C and start mixing. Then, add the ingredients of the phase A. Weight the ingredients of the phase B into a beaker and heat at 85°C. When the phase B is melted, add the phase C into the beaker and mixed with a spatula. Then, introduce B+C into the Trimix and start agitation (rotor stator 3000 rpm). Then, cool down at 60°C with slow agitation and make the vacuum. Cool down at 30°C, then, add the phase D and make the vacuum. Add the phase E and make the vacuum. Then cool down at 20°C under slow agitation.

## Raw materials from SEPPIC

### MONTANOV™ 202

#### Arachidyl Alcohol and Behenyl Alcohol and Arachidyl Glucoside

Glucolipid emulsifier derived from vegetable origin. Promoter of liquid crystals, it plays a role in maintaining skin moisturization over time. Thanks to liquid crystals which contain water, MONTANOV™ 202 helps to keep skin moisturized. Ecocert and Natrue approved.

### LANOL™ P

#### Glycol Palmitate

Texturing agent which improves the consistency of the formula and brings soft skin feel, without any soaping effect.

### SEPIPLUS™ 400

#### Polyacrylate-13 and Polyisobutene and Polysorbate 20

Thickening agent in liquid form ready to use (no predispersion or neutralization). SEPIPLUS™ 400 gives an improved electrolyte resistance. It also allows a good pick-up and guarantees a good spreadability and is compatible with a wide range of actives over a wide pH range (3 to 12).

### SOLAGUM™ AX

#### Acacia Senegal Gum and Xanthan Gum

Combination of thickening polymers. Eco-friendly product developed in accordance with sustainable development. Can be used with hot or cold process. Ecocert and Natrue approved.

### AQUAXYL™

#### Xylitylglucoside and Anhydroxylitol and Xylitol

AQUAXYL™ moisturizes and restructures the skin by harmonizing the hydric flow of the skin. Water reserves are instantly boosted, water circulation is improved in all skin layers and water loss is reduced (in vitro and in vivo tests prove this efficacy). It's mechanism of action has been validated by cosmetogenomics. Ecocert and Natrue approved.
