Maintain your skin youth!

This fluid & light elixir leaves a soft & mat finish on the skin.

ASPAR'AGE™, red seaweed marine active ingredient from *Asparagosis armata*, regulates the senescent phenomenon in order to preserve the youth skin cells against the contagious skin aging.

(Aqua/Water - Propanediol - Asparagosis Armata Extract)

Regulates the effect of "Senescent Messaging Secretome" in order to **reduce the contagious aging on young cells**. Thanks to this marine active, the **skin looks younger!**

MONTANOV™ 82 allows a fluid emulsion obtention, adapted to a dropper packaging. (Cetearyl Alcohol - Coco-Glucoside)

Glucolipid emulsifier derived from vegetable origin. Especially well-suited for formulations with a high concentration of active ingredients.

1% of SEPINOV™ EMT 10 is enough to stabilize this fluid emulsion.

(Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer)

Powder polymer "2-in-1", thickening in a wide pH range (3-12), ready to use, with excellent **stabilizing properties** at low level & in presence of a high percentage of oily phase. **Sensory profile: "satin" touch, fresh, glide-on.**

EMOSMART™ V21 brings a soft & mate finish. (C18-21 Alkane)

High-purity, non polar & biodegradable emollient. It shows an excellent compatibility with all types of oils. It allows to obtain **fresh textures with a soft finish & matt veil**. Inert & stable, it can be used in all types of applications, even in extreme conditions (pH, oxidizing/reducing media...).

LANOL 2681 reinforces the formula softness & lightness feel.

(Coco-Caprylate/Caprate)

Emollient agent from vegetable origin. Polar ester with **soft & light touch**, non greasy finish, medium playtime.
